What is FakeContent?

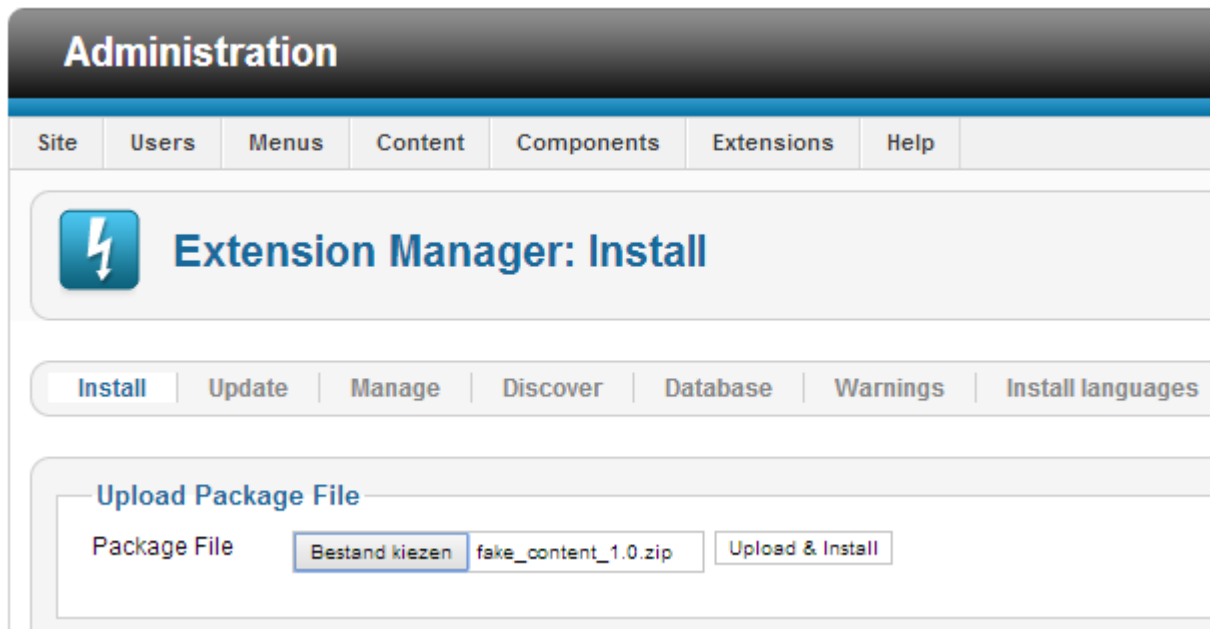

FakeContent is a component for Joomla

FakeContent is used to add dummy content to your website. So you can see how your website looks with content.

There are different kinds of content to choose, Lorem Ipsum or Mobey Dick. You can also add images. You can add module or install the plugin.

How to install FakeContent

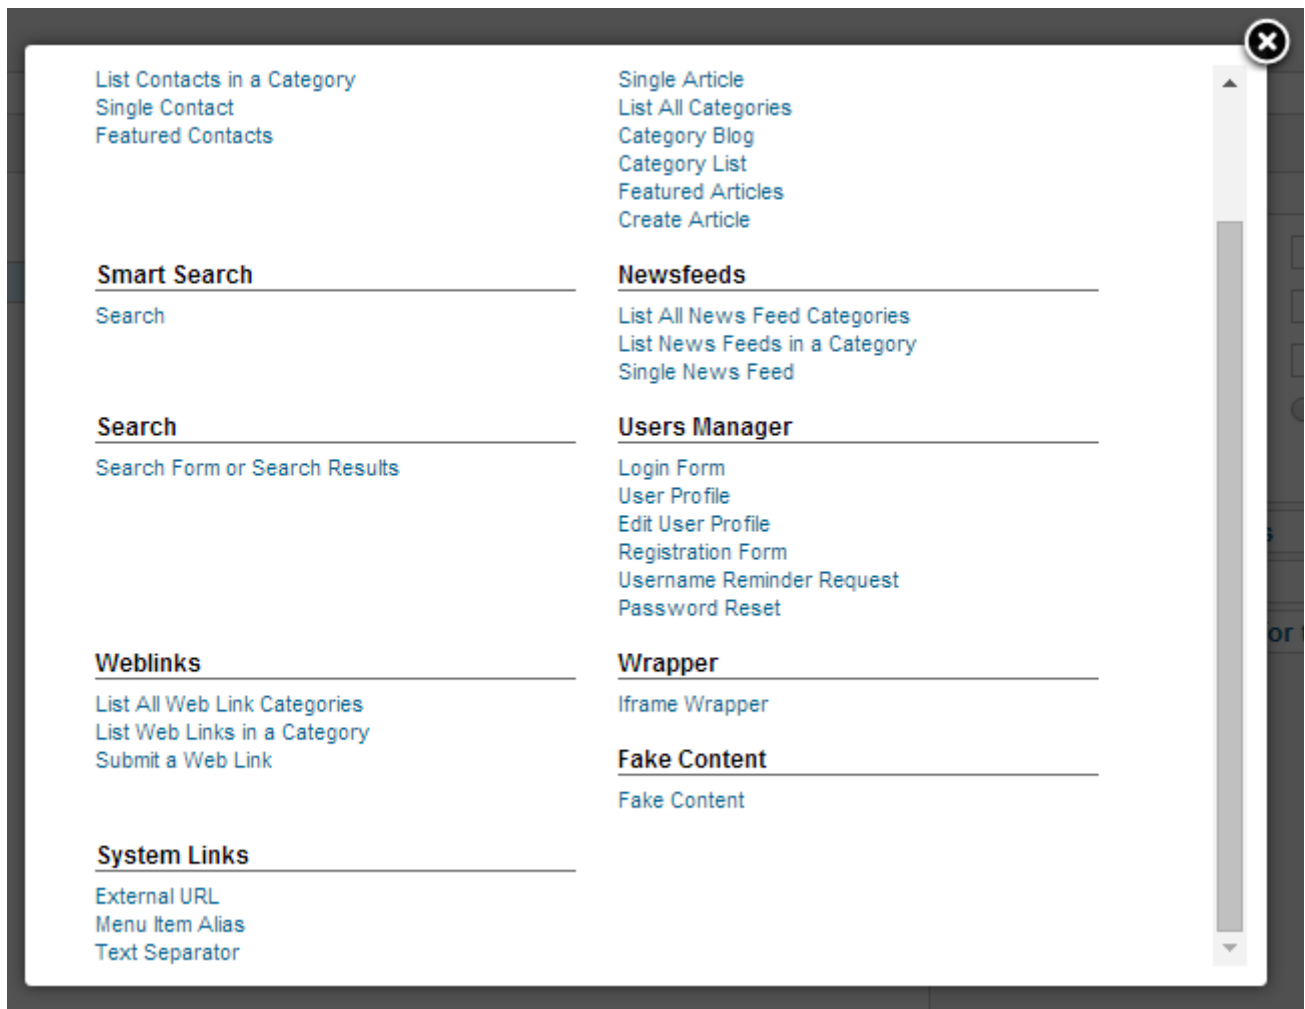

Login to your adminpanel and go to the extension manager ('Extensions -> Extension Manager'). Press 'Choose File' and choose the FakeContent Zipfile.

Click on Upload and Install. The component will be installed.

Create a menubutton

We can add a menubutton that instantly posts dummy content on the place of the article. Browse to the menu where you want to add the button and add a button. Select 'Fake content' as menutype.

On the rightside you can change different settings.

▼ **Required Settings**

Text	<input type="text" value="Lorem ipsum"/>
Text Position	<input type="text" value="Left"/>
Type	<input type="text" value="Phrases"/>
Mode	<input type="text" value="<p>"/>
Count	<input type="text" value="10"/>

Image Width	<input type="text" value="100"/>
Image Height	<input type="text" value="100"/>
Image Color	<input type="text" value="095197"/>
Image Margin	<input type="text" value="10px"/>
Custom image	<input type="text"/> <input type="button" value="Select"/> <input type="button" value="Clear"/> <input type="button" value="Preview"/>
Image Postion	<input type="text" value="Left"/>

▶ **Link Type Options**

▶ **Page Display Options**

▶ **Metadata Options**

▶ **Module Assignment for this Menu Item**

Text: What kind of text?

Text position

Type: Words, sentences or paragraphs.

Mode: Paragraphs, divs or simple breaks

Count: The amount of paragraphs you want to use

Image settings.

Use a FakeContent module

We can also add a module so you can add dummy content to any position.

Go to the module manager

Publish the module

You will see it on the rightside.

Joomla!

Congratulations! You have a Joomla site! Joomla makes it easy to build a website just the way you want it and keep it simple to update and maintain.

Joomla is a flexible and powerful platform, whether you are building a small site for yourself or a huge site with hundreds of thousands of visitors. Joomla is open source, which means you can make it work just the way you want it to.

Upgraders

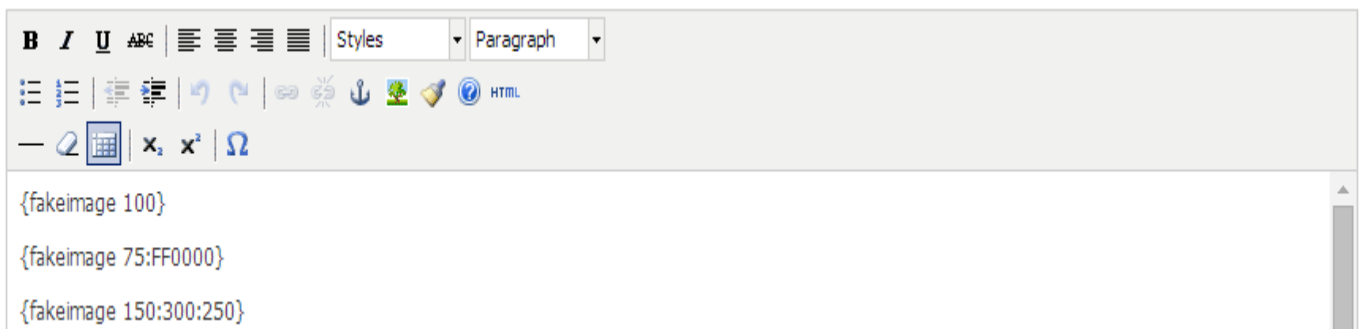

If you are an experienced Joomla! 1.5 user, this Joomla site will seem very familiar. There are new templates and improved user interfaces, but most functionality is the same. The biggest changes are improved access control

Professionals

Joomla! 2.5 continues development of the Joomla Framework and CMS as a powerful and flexible way to bring your vision of the web to reality. With the administrator now fully MVC, the ability to control its look and the

Use the FakeContent plugin

The FakeContent component also includes a plugin named: 'Fake Image'. With this plugin you can add 'test' images wherever you want.

By filling in 1 argument the width and height will be the same. By filling in 2 arguments the second will be the background color. By filling in 3 arguments you can choose width height and background color.
